

WB-2000 SERIES ADJUSTABLE WRIST STRAPS

I. Description

Static Technologies' adjustable elastic wrist strap is durable and highly effective. The woven elastic band is preferred for comfort. Workers like the feel of the band and the way it holds its shape, even after months of use. The band interior is woven with highly conductive threads that cover more than 80% of the surface area. The result is a band that makes excellent conductive contact even on individuals with extremely dry skin.

A stainless steel plate under the plastic buckle completes 360° of contact. Non-tangling coiled cords with excellent retractile qualities come in 6' and 12' lengths. A 10' lightweight cord with a 4mm snap is also available and a 6' cord with right angle banana plug for under-the-bench grounding mounts. Wrist straps include alligator clip and both 4mm and 7mm snaps are available.
