

# How To Install

The Case Consists Of 6 Layers Of Acrylic Panels, Please Install According To The Following Steps

1. Install the short standoffs and screws onto the 1st acrylic panel, please pay attention to the orientation.

2. Install the 5th acrylic panel to the USB ports and Ethernet port of Raspberry Pi 5, and then mount Raspberry Pi 5 on the short standoffs as shown.

3. Fix the Raspberry Pi 5 via long standoffs, then install the 3rd, 4th, and 6th acrylic panels.

4. Install the active cooler on the Raspberry Pi 5, then install the 2nd acrylic panel on the top and fix it via screws.
